

**Ammonium trivanadium octaoxide**  
**EINECS No. 235-384-0; CAS No. 12207-63-5**

The purpose of the Pre-SIEF is for REACH Pre-Registrants to agree upon '**sameness**' of substance.

Pre-registrants that agree upon the sameness of substance will then pass into the Substance Information Exchange Forum (SIEF) for that substance, where the data-sharing discussion begins and is coordinated by the SIEF Facilitator.

Pre-Registrants that consider they do not have the same substance will be grouped together by the Pre-SIEF Facilitator for further discussion and potential entry into sub-SIEFs or another SIEF.

All pre-registrants for **ammonium trivanadium octaoxide** will receive an e-mail with a link to participate in the 'Substance Sameness' discussion. Your response to that survey will be your participation in the Pre-SIEF 'sameness' discussion. **The typical composition for this substance can be checked below.**

<b>Substance</b>	<b>Ammonium trivanadium octaoxide</b>
Synonyms	Ammonium polyvanadate (APV)
Chemical Formula	NH <sub>4</sub> V <sub>3</sub> O <sub>8</sub>
CAS Number	12207-63-5
EINECS Number	235-384-0
Typical composition	Mass (%)
Purity	min. 97
Vanadium	min. 49.5
Chromium	≤ 0.01
Potassium	≤ 0.4
Molybdenum	≤ 0.4
Sulfur	≤ 0.3
Silicon	≤ 0.1
Iron	≤ 0.1
Sodium	≤ 0.05
Phosphorus	≤ 0.03
Tungsten	≤ 0.03

The REACH Vanadium Consortium, Auer von Welsbach Straße 1, A-9330 Althofen, Austria, [www.vanadiumconsortium.com](http://www.vanadiumconsortium.com) is a voluntary industry scheme that invites all organisations and individuals involved in the vanadium business, which have a current or future interest in the European market, to join the consortium.
