

Substance: ammonium sodium vanadium oxide

May 2012

Dear Pre-Registrant,

You have received this email because you REACH Pre-Registered with ECHA for ammonium sodium vanadium oxide (EINECS No. 254-463-0). All pre-registrants for this substance in the ECHA REACH-IT system were invited to complete a survey to agree on Substance Sameness. Thanks to those who have completed the sameness survey.

Results of this survey:

Substance Sameness Survey Results for this substance	
REACH-IT Pre-Registrants	25
Respondents to Substance Sameness Survey at May 22 nd 2012	1
Pre-registrants whose substance is not sufficiently similar to join the SIEF	0
Intended level of SIEF activity:	
Very active	0
Involved	0
Passive	1
Dormant	0
Current number of potential registrants	1
Pre-registrants with studies to offer for sharing to the SIEF	0
Pre-registrants with exposure data to offer for sharing to the SIEF	0

After evaluation of the survey responses, the Vanadium Consortium grouped together all pre-registrants that consider they do have the same substance, and they entered into the SIEF for that substance.

Thus, the SIEF members for this substance are ALL pre-registrants that agree to substance sameness reported as typical composition.

Lead Registrant

GfE Metalle und Materialien GmbH was elected as Lead Registrant as no other nominations or objections were received from other SIEF members.

Downstream Uses

You are herewith asked to please report **relevant downstream uses** to be considered in the technical dossier required for REACH registration. Intending registrants should examine the list of reported downstream uses (as attached to this email) to check if their uses are considered. If a use is not listed but you would like it to be included or if you can provide further information, please email the SIEF Facilitator.

Available studies

Furthermore, you are asked to provide information about **available studies** to the SIEF Facilitator, including the reference, i.e. name, type and year.

Other actions

The survey respondents that have engaged in the substance sameness process will be regularly updated on SIEF activities.

If you would like to be involved in SIEF activities and informed about the progress towards the completion of the REACH registration dossier, there are the following options:

1. If you have not responded to the Substance Sameness Survey yet, please do so. You will then receive further SIEF information.
2. Visit the [Vanadium Consortium](http://www.vanadiumconsortium.com) website page for progress updates.

3. Join the [Vanadium Consortium](#).

If you are not interested in joining the Vanadium Consortium, you will be able to access the technical dossier for this substance to do your REACH registration by means of a Letter of Access (LoA) on fair, reasonable and non-discriminatory terms. You will be able to purchase an LoA from the Vanadium Consortium. An LoA will grant you the 'permission to refer' to the technical dossier for REACH registration. The cost of a Letter of Access will be dependent on the data requirements according to the respective tonnage band and is yet to be determined.

With kind regards,

Vanadium Consortium Secretariat
