

Vanadium oxalate complexes
EINECS No. 308-876-9; CAS No. 98903-75-4

The purpose of the Pre-SIEF is for REACH Pre-Registrants to agree upon '**sameness**' of substance.

Pre-registrants that agree upon the sameness of substance will then pass into the Substance Information Exchange Forum (SIEF) for that substance, where the data-sharing discussion begins and is coordinated by the SIEF Facilitator.

All pre-registrants for **vanadium oxalate complexes** have received an e-mail to participate in the 'Substance Sameness' discussion. Your response to that survey is your participation in the Pre-SIEF 'sameness' discussion. **If you would like to receive the 'Substance Sameness' survey, please contact the [Vanadium Consortium](http://www.vanadiumconsortium.com). The typical composition for this substance can be checked below.**
